Professional Summary

Highly motivated **Full Stack Developer and Computer Science professional** with hands-on experience in **Java, Python, Angular, React.js, Next.js, Node.js, and SQL**. Skilled in **front-end development, REST API development, database integration, software testing, QA, troubleshooting, and problem-solving**. Experienced in developing scalable web and AI-powered applications using **Agile methodologies**. Strong **communication, teamwork, creativity, and collaboration** skills, with a commitment to writing clean, maintainable code and delivering reliable, user-focused software.

Education

University College of Engineering, Kanchipuram

Bachelor of Engineering (B.E.), Computer Science Engineering

11/2022 – 05/2026

Tamil Nadu

CGPA: 8.1

Experience

Approtech R&D Solutions, Tambaram

Full Stack Development Intern (Java)

06/2025 – 07/2025

Chennai, Tamil Nadu

- Developed **Pixpop**, an AI-powered web application integrating **Hugging Face and Stable Diffusion APIs**.
- Implemented API request/response workflows and frontend features using **JavaScript, HTML5, and CSS3**.

Projects

BookIt – Full-Stack Appointment Booking Platform

Next.js | TypeScript | Node.js | Express.js | PostgreSQL | Prisma | Stripe | Twilio

- Developed REST APIs for **appointment scheduling, user management, bookings, and business workflows** using Node.js and Express.js.
- Implemented **RBAC, JWT authentication, database transactions, concurrency-safe scheduling, Stripe payments, and Twilio notifications**.

Dayflow – Human Resource Management System (HRMS)

Java | Spring Boot | React.js | MySQL | REST API | Spring Security | JWT | Docker

- Built a role-based HRMS for **employee management, attendance, leave, payroll, and HR approval workflows**.
- Developed REST APIs and responsive dashboards with **JWT authentication, RBAC, attendance analytics, employee records, and leave management**.

Eco-Coder – AI-Based Green Code Optimizer

Java | Spring Boot | CodeBERT | PyTorch | Hugging Face Transformers | Streamlit | AST | MySQL

- Developed an AI-powered green code optimization platform that analyzes **Java source code** to identify energy-inefficient patterns including nested loops, redundant computations, memory overuse, and inefficient string operations.
- Integrated **CodeBERT-based code analysis, static analysis, Green Score evaluation, explainable AI (XAI), and automated optimization rules** to generate optimized code recommendations and actionable sustainability insights.

Technical Skills

Programming: Java, JavaScript, Python

Frontend: React.js, Next.js, HTML5, CSS3

Backend & APIs: Spring Boot, Node.js, Express.js, REST APIs, API Integration

Databases: MySQL, PostgreSQL

Security: Spring Security, JWT, RBAC

AI / ML: Stable Diffusion, CodeBERT, PyTorch

Tools: Git, GitHub, Docker, VS Code

Training & Certifications

KodNest

Full Stack Development Training

06/2026 – Present

Bengaluru, Karnataka

Currently pursuing intensive full-stack development training covering **Java, Spring Boot, REST APIs, MySQL, React.js, and** frontend technologies through hands-on, project-based learning.

Certifications: Java with Spring Boot – Digisailor | Cisco Certified Network Associate (CCNA) – 1
